Mobile: 050-2161755 | Email: Shirly1986@gmail.com | [Linkedin Profile](#) | [Github](#)

A full stack / frontend developer with hands-on experience in developing Progressive Web Applications & Single-Page Applications with efficiency in minimum time. I'm a quick learner and highly motivated with ability to work well under pressure and deadline, great team player with high interpersonal communication capability. **Elected to Outstanding worker.**

[My portfolio](#)

Experience & Projects:

- Building personal project using React in She Codes.
- [Recipes Marketplace](#) - An app that allows sharing recipes and purchasing products, you can find a recipe by specific ingredient or by food, there is an option to contact the owner of the recipe, you can rate the recipes and write reviews, you can register as a user.
Technologies: React, Hooks, Sass, Node.js, MongoDB, Hooks, Rest API, Ajax, Socket.io, Redux, SPA.
- [Appsus](#) - The app allows sending and receiving emails, deleting and editing emails, marking favorites, search specific email, there are notifications when an email is sent or deleted.
You can write notes, upload videos and photos, delete and edit a particular note, pin notes.
The app also includes a bookstore where you can find a wide variety of books.
Technologies: React, CSS, SPA.
- [Meme](#) - A free online image maker that allows you to add custom resizable text to images. It operates in HTML5 canvas, so your images are created instantly on your own device. You can use the generator to add text captions to established memes, so technically it's more of a meme "captioner" than a meme maker. However, you can also upload your own images as templates.
Technologies: JavaScript, CSS, Canvas, MVC, SPA.
